

3D Printing

Armadale Library has a FlashForge Guider 3 to print 3D objects.

Our printer uses PLA filaments available in a variety of colours.

To print, you will need to fill in the *3D Printing - Booking Form* and send it with your 3D image file (preferred types are STL or OBJ).

This form can be found at **library.armadale.wa.gov.au/3d-printing**.

Please note, the library does not provide a design service.

Costs: Charges are based on total print time with the first hour costing \$10, and \$3 for each additional hour, or part thereof.

Size: The limit of the build area is 290mm (L) x 240mm (W) x 330mm (H)

The 3D print service operates as first come, first served and print times can depend on the size of the waiting list.

Completed prints can be collected from the library's front counter.

Payment is due on collection.
